

Self Diagnosis

Modern vehicles are packed full of modules - continuously monitoring themselves and reporting their status. The first indication of a vehicle problem is often a warning light on the dashboard. Our kit allows you to diagnose and fix the problem.

"Faulty EGR Valve"

Vehicle Coverage

It's true that our diagnostic systems are powerful - they're also easy to use. That said, there are inevitably times when you need to talk to somebody to solve a particular problem.

That's why Eclipse offer a dedicated telephone technical support service - your solution is never more than a phone call away.

1st Class Vehicle Diagnostic Support

- Dedicated Tech Support telephone line
- Extensive library of technical data including high level tools
- Fault codes, procedures & advice
- Fax/Email provision of wiring diagrams and procedures
- Available 8:30 - 5:30 Monday - Friday
- UK Based call centre
- Remote assistance via Internet

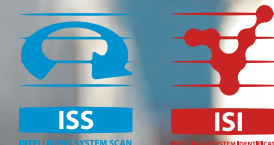

Training Available

Courses regularly run - check online or call for details

Unique Lifetime Hardware Warranty!

EDIS hardware is guaranteed for as long as you maintain a continuous software updates contract.

Lead, LED & internal battery excluded.

Our easiest tool to use.

The one screen Vehicle setup page makes Eclipse EDIS® a fast and powerful performer.

The data that EDIS uses is BOUGHT from vehicle manufacturers - not reverse engineered from their own diagnostic tools. This way we get it to market quicker and more accurately - with regular software updates sent to you on DVD.

Bluetooth or USB - the choice is yours

EDIS communicates with your computer using convenient wire-free Bluetooth or ultra reliable USB.

Car coverage ranges from the tiny Toyota IQ to the massive Iveco Daily.

Power

PC Comms

Vehicle Comms

Insufficient Voltage

Flight Recording

Unique Multi Colour Status Indicator

Light when and where you need it

When you're searching for the OBD socket there's no need to start out with a torch - EDIS has a super bright LED built right in to the OBD plug.

Eclipse EDIS® bluetooth multiplexer

Flight recorder function - diagnose intermittent faults at last

Vehicle data is saved to a SD Card for later retrieval. No need to leave your computer in the vehicle!

Seamless integration with the workshop data program you already use - Autodata

Also available for Truck, Trailer, Bus and Coach. Just add an integration kit & license.
