

# IDC4 and IDC4 POCKET update

**CAR 45.0.0**

**TEXA**

## Dear Customer,

thank you for installing the new IDC4 CAR software version. Once again, this version is rich with new diagnostic content, allowing you to be sure you have the most complete and reliable tool at your side every day.

This version includes new developments for 101 models from the following brands:

ALFA ROMEO, BMW, CHEVROLET, CHRYSLER, CITROEN, DAIHATSU, DODGE, FIAT, HONDA, JAGUAR, JEEP, LANCIA, LAND ROVER, MAZDA, MERCEDES-BENZ, MITSUBISHI, OPEL(GM), PERODUA, PEUGEOT, RENAULT, RENAULT SAMSUNG, SSANGYONG, VOLVO.

### Of the many diagnosis functions included in this version, we particularly wish to highlight:

- BMW Start and Stop reset with related control unit coding;
- CHRYSLER AIRBAG control unit initialisation;
- Ford FOCUS particulate filter regeneration, Injector Coding and EGR valve calibration;
- Injector and particulate filter replacement for CORSA D;
- Particulate filter regeneration for VOLVO V70 series II and EGR valve calibration for S80;
- Throttle body replacement for FIAT PUNTO MULTIAIR

As always, IDC4 constantly adds to its database by inserting new information and wiring diagrams version after version, all with the aim of helping you in those cases where reading available information by connecting the diagnosis tool to the vehicle is not enough to solve the problem.

You can browse through all these new features via the DOCUMENTATION menu in the IDC4 software. Here it is plain to see how TEXA works on new developments day after day - all in order to provide you with a tool as professional as you are!

Keep up the good work with TEXA!

## **WARNING**

The trademarks and logos of vehicle manufacturers in this document have been used exclusively for information purposes and are used to clarify the compatibility of TEXA products with the models of vehicles identified by the trademarks and logos. Because TEXA products and software are subject to continuous developments and updates, upon reading this document they may not be able to carry out the DIAGNOSTICS of all the models and electronic systems of each vehicle manufacturer mentioned within this document. References to the makes, models and electronic systems within this document must therefore be considered purely indicative and TEXA recommends to always check the list of the "Systems that can be diagnosed" of the product and/or software at TEXA authorized retailers before any purchase. **The images and the vehicle outlines within this document have been included for the sole purpose of making it easier to identify the vehicle category (car, truck, motorbike, etc.) for which the TEXA product and/or software is intended.** The data, descriptions and illustrations may change compared to those described in this document. TEXA S.p.A. reserves the right to make changes to its products without prior notice.
